

# Django E-commerce Learning Plan - 3 Months

## Overview

This is a 3-month (90-day) structured learning plan to master Django and build a full E-commerce system from scratch. The plan is divided into 3 phases:

1. Learn Django Fundamentals (Day 1-35)
2. Build E-commerce Project (Day 36-75)
3. Polish, Improve & Deploy (Day 76-90)

## Learning Plan Breakdown

### Days 1-10

Python Refresh, Django installation, setup project, apps, URLs, templates.

### Days 11-20

Models, migrations, admin panel, forms, CRUD operations, authentication system.

### Days 21-35

User profiles, image uploads, filtering, pagination, error handling, mini practice project.

### Days 36-45

Start E-commerce project: product model, product display, cart system.

### Days 46-55

## **Django E-commerce Learning Plan - 3 Months**

Checkout, orders, user profiles, order history, Stripe/PayPal integration.

### **Days 56-75**

Admin panel for product/order management, email notifications, UI improvements.

### **Days 76-85**

Make the app responsive, testing, bug fixing, security improvements.

### **Days 86-90**

Final polish and deployment to Render.com or Railway.app, GitHub linking.
