

Proposal Title: Responsive Website Development for a Data Consulting Firm

Hello!

I'm Ahmett Nuur Mohamuud Warsame, a Full Stack Developer with hands-on experience in building responsive, fast-loading websites using Python (Django/Flask), JavaScript, and HTML/CSS. I've helped companies and startups create intuitive and user-friendly platforms — both visually appealing and functional.

What I Will Provide:

- A responsive website that works seamlessly across desktop and mobile
- Clean, modular code using Python and modern frontend best practices
- Pages such as Home, Services, About, and Contact (or any others you require)
- Optionally deploy the site or prepare it for easy deployment

Tech Stack:

- Python (Flask or Django)
- HTML5, CSS3 (Tailwind CSS or Bootstrap)
- JavaScript (vanilla or framework if)

Timeline:

- Estimated time: **10–15 days**

Budget:

- Estimated cost: **\$150** (negotiable based on exact scope)

Please feel free to share more details about the design or any existing assets you want to incorporate. I'd be happy to show you examples of similar work upon request.

Looking forward to working together!

Best regards,

Ahmett Nuur Mohamuud Warsame

Full Stack Developer
