Proposal Title: Pixel-perfect HTML & CSS Form Based on Provided Photo

Hello!

I'm Ahmett Nuur Mohamuud Warsame, a Full Stack Developer with solid experience in front-end development using HTML, CSS (Tailwind or custom), and JavaScript. I understand that you're looking to convert a photo into an exact HTML/CSS replica to be used within a CRM system for CV generation — and I'm confident I can deliver exactly what you need.

☑ What I Will Deliver:

- A **pixel-perfect HTML page** based on the photo you'll provide.
- **Well-structured, clean, and responsive HTML and CSS** code.
- CSS code can be included in a **separate file** for easy management and CRM integration.
- All data will be **on one page** as requested.
- Fast delivery, attention to detail, and clean formatting for CRM compatibility.

⚒ Tools & Technologies:

- HTML5
- CSS3 / Tailwind CSS (or custom CSS based on your preference)
- Optional: Bootstrap if you prefer a framework (but I usually go with clean, lightweight code)

💰 Fixed Price: $100

This includes everything — design recreation, responsive layout, clean code, and minor revisions.

⏱ Turnaround Time:

I can complete this task within **2–3 days** after receiving the photo and any additional instructions.

I'd be happy to get started right away — feel free to share the image so I can begin the process.

Thanks for considering my proposal. I look forward to working with you!

Best regards,
Ahmett Nuur Mohamuud Warsame
Full Stack Developer
